

A

B

Candidate selective pressures

- 1 - Anoxia
- 2 - Prolonged dormancy
- 3 - Pathogen

Candidate ecological adaptations

- a - Hypoxia tolerance
- b - Transcriptomic tolerance
- c - Constrain of viral replication
- d - Temperature sensing
- e - Effective clearance of transcripts
- f - Enhanced protein quality control
- g - Chromatin silencing
- h - Epigenetic regulation
- i - Cell integrity
- j - Longevity
